

Hydrolysis Unit E-416 / B-411

Cost-effective and compliant

The Hydrolysis Units E-416 and B-411 ensure safe and fast acid hydrolysis of up to 6 samples simultaneously. Assure conformity with official regulations for the declaration of the total fat content.

Compliant

Follow officially approved regulations and norms

Safe

Avoid harmful fumes in your laboratory

Straightforward

Profit from a perfect match between hydrolysis and extraction

E-416 / B-411: Your most important benefits

Compliant

- Compliant with official regulations (e.g. AOAC, ISO, DIN)
- Reproducible thanks to standardized and exhaustive procedures

Safe

- Convenient transfer of the hydrolysate without getting in contact with the sample
- Effective sealing avoids harmful emissions

Straightforward

- Fast and effective heat transfer to samples by means of IR radiation
- Simultaneous hydrolysis, filtration and rinsing of up to 6 samples
- Sample tube designed to use directly with E-816 or B-811
