MicroW L Flexible

MicroW L Flexible is a temperature data logger from -40°C to 140°C (calibration from 25°C to 140°C) with 30 cm felxible probe and 50 mm or on demand length external probe (probes cannot be switched) on a 5 mm base (base height is not counted for probe length), managed with Windows software and USB interface (DiskInterface HS, Multibay). Battery is user replaceable and the data logger is provided with an Accredia (NIST equivalent) traceable certificate on 6 points.

For a longer life time choose MicroW XL Flexible, with a bigger battery.

Note: if used below -30 $^{\circ}$ C, battery life will be highly reduced.
